### How do I install a USB printer on Windows 98 or ME?

Connect the printer to the PC and switch the printer on. The Add New hardware Wizard will appear. Follow the on screen instructions selecting specify a location and browse or simply type in the following path X:\ENGLISH\WIN98 (where X is the drive letter of your CD-ROM. The Add New hardware Wizard will appear again, Follow the same process as above and on completion please restart your computer.

#### Instructions

Connect and switch on the printer. The Add New Hardware Wizard will now appear. Click **Next**.

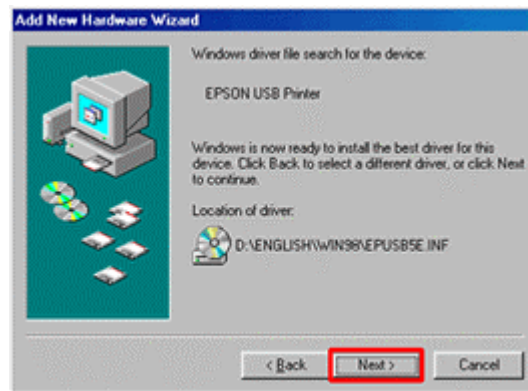

Select **Search for the best driver for your device** and click **Next**.

Ensuring that only **Specify a location** is ticked, Please then browse to or simply type in the following path X:\ENGLISH\WIN98 (where X is the letter of your CD-ROM drive). Click **Next**.

Windows will now find the required INF file. Click **Next**.

Click **Finish**.

Windows has now configured the USB port. To install the driver for the printer click **Next**.

Select **Search for the best driver for your device** and click **Next**.

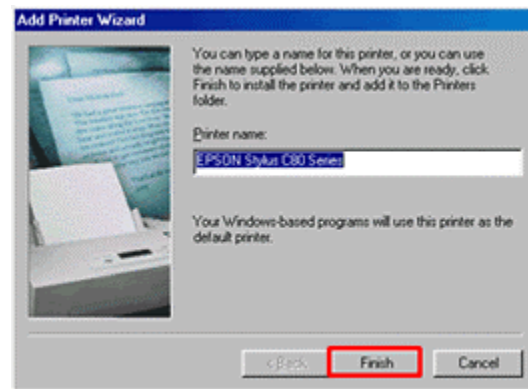

The following path should be present **X:\ENGLISH\WIN98** (where X is the letter of your CD-ROM drive). If not please browse or simply type in the path ensuring that only Specify a location is ticked. Click **Next**.

Windows will again find the required INF file. Click **Next**.

Here you can enter a different name for your printer if desired. Click **Finish**.

This will now copy the files.

Click **Finish**.

Setup is now complete. Please restart your computer. To be able to monitor your ink levels you will need to install the Status Monitor Utility supplied on the EPSON Printer Software CD-ROM. For instructions on how to do this please click this link:
