How do I install iscan on Debian Linux distribution ?

You have to do the following steps in order to install iscan on Debian distribution:

1.) Download iscan-x.x.x.rpm , not the source tarball.

Then, trsnform rpm package in deb package

2.) `alien -d iscan-1.5.0-6.i386.rpm`

and finally, install the package on your system

3.) `dpkg -i iscan-1.5.0-6.i386.deb` (the resulting deb file from step 2)
