How to new a program in the Application list?

Instructions

1. Click Settings in Launch Assistant.

2. Select Register in the dialog box.

3. Click Browse to locate the application that you want to register.

4. In Title field, name the application you are going to add.

5. Select a file format for the application in the lower part of the dialog box. The format you specify will be the default file format when you transfer the scanned images to the application.

6. Click **OK** to register the new application.

Note: The registering a new application feature is only available with image-editing application.
