Why The last part of a page, that is about 2 lines, can't be printed using PIPS on Linux. How can I print the whole page?

The following margins are required, except the case of borderless printing.

Top margin: 3mm

Bottom margin: 14mm

Left/Right margin: 3mm

Print data outside printable area is ignored. We think that your data was cut at the margin, since the data exceeded the printable area. Please edit your data within the printable area.
